

kite® Kite® TABLE SYSTEM

PRODUCT DETAILS

- Four shapes: (See page ?)
 - Rectangle
 - Kite shape
 - Square
 - Semi-circle
- All of the above shapes fold easily on a unique patented frame
- There are three leg options:
 - Graphite straight leg
 - Chrome straight leg
 - Silver tapered leg
- All legs are fitted with locking castors which have a levelling facility
- Tops are 25mm thick
- Standard MFC finishes are Beech, Light Oak and Maple
- Modesty panels can be fitted P.O.A.
- The table still folds with modesty panel fitted

THE ADVANTAGES OF Kite® TABLES ARE:

- Risk Assessment: Low risk - no heavy lifting
- Operating Costs: Lower costs – one person operation
- Potential for damage to tables: Low risk – tops always remain on the frames
- Trolley: No trolley required
- Potential for damage to doors: Low risk – table easily travels through doors whilst one hand can remain free to open the door
- Flexibility: Excellent – the unique Kite® shape permits more layout options than any other system
- Ease of configuration: Easy – no additional components required for any of the layouts
- Use of space: Excellent – particularly in training layouts where two people can sit comfortably at the corner link
- Comfort: Excellent – each delegate has a 750mm wide defined position and no-one sits astride a table leg
- Product applications: Excellent – Kite®, can adapt to meeting, conference, training, catering or desking applications
- Human flow: Excellent – the 30cm profile allows transportation along corridors without hindering colleagues or blocking gangways
